Super-U

# PAULINE MARTINEAU

## STUDENT AT SCHOOL 19

My artistic sensitivity combined to my computer science skills and a thirst for knowledge pushes me to constantly self-educate, learn, develop and improve my skills through developing personal projects.

I can work autonomously and enjoy it, but also my formation made me develop a real team spirit and the ability to blend into a collective, as well as being a team leader if needed.

Being naturally rigorous and dynamic, I pay great attention to details in order to produce a precise and efficient work.
